Subject: Checking In

Ryan,

Checking in to make certain that you are getting everything you need regarding the ITC fire in Deer Park. Let Anne or I know if you need anything.

I'd like see more progress and had a good discussion with Texas. They are pressing ITC to more fully utilize mutual aid agreement from area facilities and identify any shortfalls that the state/fed could help resource. Williams Fire Service is assessing the situation tonight and will let the state know if there is more that ITC should/could be doing. US Coast Guard is working activate their Strike Team now that water traffic is impacted in the area. ASPECT is returning for some overnight repairs but plans to fly again at 8 am. Our teams are doing good work and fully integrated with TCEQ, Coast Guard and Harris County emergency operations.

Best,

David
